

## Efka® FA 4609 AN

(old : Efka® 4609)

The Chemical Company

### general

low-molecular-weight dispersing agent

- polymeric wetting and dispersing agent with acidic groups
- very efficient in wetting and dispersing of titanium dioxide, fillers, extenders and other inorganic pigments like iron oxides
- high pigment and filler loading
- suitable for solvent-based systems
- strong reduction of mill base viscosity
- reduced pseudoplastic rheological behavior
- increased hiding power
- broad compatibility in a wide range of resin systems
- suitable for high gloss systems

### chemical nature

solution of a copolymer with acidic groups

## Properties

### physical form

clear, slightly yellowish liquid

### shelf life

Efka® FA 4609 AN should be stored in tightly closed containers and in a cool place. Mix well before use. In case of separation or turbidity heat-up to 30 – 40 °C and stir.

### typical properties (no supply specification)

density at 20 °C (68 °F)	~ 1.03 g/cm <sup>3</sup>
Solid content	~ 52 %
acid value	~ 53 mg KOH/g
solvent	methoxy propyl acetate / alkylbenzenes 1:1

## Application

Efka® FA 4609 AN shows outstanding performance in dispersing and stabilizing inorganic pigments in particular titanium dioxide. In combination with a universal solvent based grinding resin like Laropal® A 81, low mill base viscosities with reduced pseudo plastic flow behavior can be achieved. Furthermore, Efka® FA 4609 AN is highly suitable to disperse iron oxide pigments.

Efka® FA 4609 AN is suitable for many coating systems such as:

- automotive refinish and OEM coatings
- solvent-based industrial coatings
- coil coatings, especially TiO<sub>2</sub>
- wood coating

Because of its anionic character, Efka® FA 4609 AN may have a catalyzing effect on the curing reaction in some baking enamels.

## recommended concentrations

Recommended dosages active on pigment / filler of Efka® FA 4609 AN are:

fillers or extenders	1.5 – 2.5 %
TiO <sub>2</sub>	3.0 – 6.0 %
other inorganic pigments	3.0 – 6.0 %

Efka® FA 4609 AN should always be incorporated into grinding medium before the addition of pigments or fillers.

## Safety

When handling this product please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.

## Note

The data contained in this publication are based on our current knowledge and experience. In view of the many factors that may affect processing and application of our product, these data do not relieve processors from carrying out their own investigations and tests; neither do these data imply any guarantee of certain properties, nor the suitability of the product for a specific purpose.
