

# Rheovis® HS 1980

(old : Starvis® T 180F)

## general

Rheovis® HS 1980 is an associative thickener with thixotropic rheology specially designed for use in water-proofing membranes.

## chemical nature

Polymer based on an acrylic ester/methacrylic ester copolymer

---

## Properties

### physical form

white to slightly colored, powder

### shelf life

Subject to appropriate storage under the usual storage and temperature conditions, our product is durable for one year.

### typical properties (no supply specification)

solids	~ 97 %
bulk density	~ 400 kg/m <sup>3</sup>
pH	~ 5

---

## Application

Rheovis® HS 1980 is especially suitable for use in water proofing membranes.

0.05 - 0.10% in relation to weight of dry material mix. The best thickening performance should be reached with pH-values > 9.0

**Safety**

When handling this product please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.

**Note**

The data contained in this publication are based on our current knowledge and experience. In view of the many factors that may affect processing and application of our product, these data do not relieve processors from carrying out their own investigations and tests; neither do these data imply any guarantee of certain properties, nor the suitability of the product for a specific purpose. Any descriptions, drawings, photographs, data, proportions, weights, etc. given herein may change without prior information and do not constitute the agreed contractual quality of the product. The agreed contractual quality of the product results exclusively from the statements made in the product specification. It is the responsibility of the recipient of our product to ensure that any proprietary rights and existing laws and legislation are observed.
